**Before the
Federal Communications Commission
Washington, D.C. 20554**

In the Matter of)	
)	
Amendment of 73.202 (b))	MB Docket No. 02-300
Table of Allotments)	RM-10576
FM Broadcast Stations)	
(Colorado City, Texas))	

To: John Karousos, Assistant Chief
Audio Division of the
Media Bureau

PETITIONER's COMMENTS

1. Petitioner respectfully submits that the public interest would be served by allocating Channel 257A to Colorado City, Texas, as that community's first competing commercial FM service. Colorado City is an incorporated city of 6,030 people as of January 1, 1998 according to the Texas State Data Center. Colorado City is also the county seat of Mitchell County. Colorado City has its own mayor, Bob Rieley, its own post office, its own school system, its own fire department, its own city hall and a number of local churches.

2. As the Commission is aware, this is one of a number of petitions filed by this Petitioner and other like-minded petitioners. The purpose of filing such petitions is to seek allotments to relatively small communities which are sufficiently removed from *major* metropolitan areas that there is no prospect that the allotment is merely a step to inaugurate still another facility serving a major broadcast market. These petitions seek allotments to relatively small communities in their own right. For reasons stated above,

the instant petition merits the requested allotment under established principles in Section 307(b) of the Communications Act.

3. The filing of a number of similar petitions has its genesis in the recent development in radio broadcasting of Localized Network Programming. This is a concept that has been developed by the major broadcasters for essentially mid to major markets. It is an approach that provides the economy of a network but the feel and appearance of local programming. The belief of the Petitioner and like-minded petitioners is that such a plan will work with small market communities on a regional basis. Given a geographical area, such as Eastern Oklahoma, Western Oklahoma, North East Texas, West Texas, South Texas, etc., the licensees of FM stations in small communities of a given region – whether the petitioners themselves or other licensees who might successfully outbid them for the license – could initiate unique network programming designed specifically for that region and additionally provide localized community inserts, such as local weather, local events, programming from specific remote locations, regional-specific news, public affairs, public service announcements, promotions and other programming giving life to the commission's policy favoring localism in broadcasting. While there would be local sales, the focus would also be in regional network sales, drawing on the advantages of advertising to the region and the unique nature of the region.

4. The vision is that providing radio service to an area of, say, 5,000 people may not allow for the operation of a traditionally run radio station. However, a network of ten stations in an identifiable geographic area covering, say, 50,000 people could very well be economically viable. This concept is an approach to providing radio service to

clusters of stations in small communities in the nature of modern radio developed by the major group owners for mid and large markets. Such a concept -- in lieu of allotting the frequencies to communities in or adjacent to major radio markets -- provides a further public interest reason in support of the Petition under Section 307(b).

5. Should this petition be granted, and Channel 257A be allotted to Colorado City, Texas Petitioner will apply for Channel 257A, and after it is authorized, will promptly construct the new facility.

The information provided in these Comments is correct and true to the best of my knowledge.

Respectfully submitted,

Linda Crawford
